

Wireless bone conduction headphones

Design For City Sports

Product description

① Volume control keys; ②Power key; ③USB Charging port; ④Indicator light

⑤Multifunction key

1. Accessories

Silicone tension band; USB Charging cable; Instruction manual.

2. What's special?

Headset uses the bone conduction speaker so the sound can pass through the skull directly to the auditory center, which eliminates many steps of acoustic transmission. It can achieve clear sound reduction in a noisy environment, so as to release the ears and revert to the delicate tone function. Suitable for people who jog, run, cycle, etc.

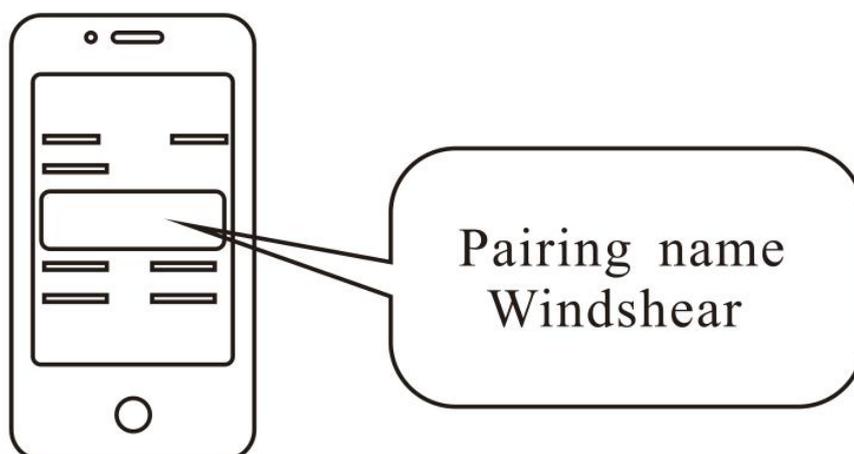

3. How to wear

You can hang the headset on back of the neck, and put both sides of the speakers close to the cheek bone near the ears. If you feel the shaking of the headset, we recommend using silicone tension band.

4. How to operate

Press and hold the power button for two seconds until the blue light which indicates power is on. For first time matching, hold the power button until the indicator light flashes, indicating pairing mode. Turn on Bluetooth on mobile phones then search the bluetooth device and choose “Pairing name :Windshear”. Click the pair option. After matching for the first time, the headset will automatically connect after pressing power button within 10seconds.

Click “+”“-” to increase or decrease volume. Hold “+” to fast forward to the next song. Press the volume key “-” to go back to the previous song. Press the multifunction key to pick up or hang up incoming calls. Click play or pause when playing music.

5. Specifications

Playback time

up to 5 hours

The standby time

up to 10 days
